

NILAMs End-to-End System Flowchart

Legal document application, PUU drafting/vetting, governance approval, signing and lifecycle monitoring

System: NILAMs
Document: Operational Workflow
Prepared: 14 August 2026

ROLE COLOUR KEY

- PIC / Applicant
- Legal Advisor / PUU
- Drafter/Vetter
- MEU / LPU / VC
- Signatory / Closure
- System automation

Solid arrows show the main journey. Split boxes show alternative outcomes. Dashed notes describe return loops or optional paths.

CROSS-CUTTING SYSTEM BEHAVIOUR

- Role- and permission-based access controls what each participant can view or update.
- Status history, document versions and notifications provide traceability across hand-offs.
- PUU Monitoring tracks assignment and vetting workload, SLA risk, breaches and turnaround.
- Reports and exports provide operational, management and institutional oversight.

PRIMARY OUTCOMES

Executed
Signed legal document

Returned
Correction required

Stopped
Declined, withdrawn, KIV or abandoned

Prepared from the current NILAMs application routes, controllers, roles, application statuses and document statuses.
